## ALIGNMENT: Strategic & Tactical Joint Practice

Power building in this period calls for grassroots forces to increase alignment and expand our reach.

We're aligning at 4 levels of movement, from the bottom up:

### MASS-BASED RESISTANCE / POST-100

Through our role on the PCM we helped convene major march organizers and organizations/movements that were in motion in the first 100 days of this administration, from the Women's March to the Tax March to the March for Science to Indivisible. We are exploring with this broad set of forces to see if there is a basis of unity to grow the resistance movement, bringing our politics, approaches, and grassroots leadership to the space.

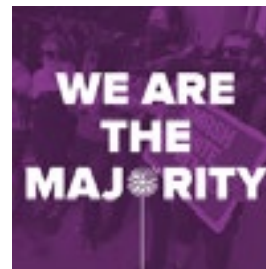

### PEOPLE'S CLIMATE MOVEMENT (PCM)

Through our role on the PCM Steering Committee, we mobilize frontline leadership within the larger climate movement and navigate relationships between the grassroots organizing sector and the big environmental organizations. We mobilized over 200,000 people to the March for Climate, Jobs & Justice on April 29 in Washington DC, helping organize the frontline contingent that brought thousands of Indigenous, black, people of color and working class white folks to the march and sister marches.

### BEYOND THE MOMENT / THE MAJORITY

The Majority is a black-led multi-racial coalition of left organizations and movements aligning and moving social movements and politics towards more progressive left stances, joint work, and coherent strategies. We organized a powerful arc of action, from 50 political education events on April 4th centering Dr. Martin Luther King, Jr's "Beyond Vietnam" speech to May Day actions in 25 cities to rapid response confronting white supremacy from Charlottesville to the White House.

### IT TAKES ROOTS

It Takes Roots is our most natural core alignment with sister alliances—a multiracial cross-sector alliance of alliances led by women & trans people of color and Indigenous peoples on the frontlines of racial, housing and climate justice across the US and Canada. It is an outcome of years of organizing and relationship building across the Climate Justice Alliance (CJA), Grassroots Global Justice Alliance (GGJ), Indigenous Environmental Network (IEN), and Right to the City Alliance (RTC). Visit <http://ittakesroots.org> to follow all the mobilizing and strategizing we are doing together.

**Grassroots Global Justice Alliance (GGJ)** is a national alliance of over 60 US-based grassroots organizing groups who integrate an international perspective into their local & regional work for climate justice, gender justice, an end to war and a just transition to an economy that is better for people and the planet.

### Program Highlights of 2017:

We held our 2nd **Feminist Organizing School**, addressing the greater need for political and popular education during this groundswell of women's mobilization. In the context of right-wing attacks on women & trans people and on social movement gains in recent decades, our curriculum explores the intersections of patriarchy, climate change & white supremacy.

We supported development of **Just Transition** plans in 2 regions:

Indigenous communities building economic sovereignty in **Fort Berthold ND** surrounded by over 2000 fracking wells; and OPAL Environmental Justice organized over 250 frontline leaders from across **Oregon** to an assembly aimed at dismantling white supremacy & building an economy based in interconnectedness, cooperation and caring.
